

Tank Mix Guide (revised 2026)

Typically, the W.A.L.E.S acronym is used to ensure plant protection products are added to the spray tank in the right sequence. There are five clearly defined sections. Tick off tank mix components as you add them.

Other	1		Add any required water conditioners	
Water Dispersible Granules, Wettable Powders (Solids)	2	WB	Water soluble Bags	
	3	WG	Water Dispersible Granules less than 100g/ha	
	4	WG	Water Dispersible Granules more than 100g/ha	
	5	WP	Wettable Powders	
Agitate	6		(In order to ensure dispersion of solids through spray solution)	
Liquid Suspensions	7		Compatibility Agent	
	8	SC	Suspension Concentrate	
	9	CS	Capsule Suspensions	
Emulsions and emulsifiables	10	SE	Suspo-Emulsion	
	11	EW	Oil in Water Emulsion	
	12	EC	Emulsifiable Concentrate	
	13	OD	Oil Dispersion	
	14		Other Adjuvants	
Soluble liquids	15	SL	Soluble liquids	
	16		Micro-nutrients* / Foliar feeds / Bio-stimulants	

* add micro-nutrient products formulated as a suspension concentrate in with other suspension concentrates, not as the last tank mix component unless the product label states otherwise
